

WORKOUT LOG

Log today's session — writes straight to GitHub, same as the dashboard console.

[← Back to dashboard](#)

1 - ACCESS

Paste your fine-grained GitHub token (Contents: write, scoped to Project-50 only). It stays in this page's memory and is never saved or sent anywhere except GitHub. Closing the tab clears it. If you already generated one for the update console, the same token works here.

GITHUB TOKEN

LOAD TRAINING LOG

Generate at GitHub → Settings → Developer settings → Fine-grained tokens.
Repository access: only **Project-50**. Permission: **Contents → Read and write**. Never paste this token anywhere public.

2 - PICK A WEEK

Weeks 2-11 are training weeks. Week 1 is the baseline panel, Week 12 is deload + retest.

3 - REVIEW & SAVE

Check the changes below, then commit. This fetches the latest file, applies your edits, and pushes one commit.

No changes queued yet.
