

How this block works

This is Block 1 of an 8-block, 2-year progression toward your 100-mile trail ultra capstone. Since there's no locked benchmark test yet, Week 1 is a Baseline Panel across all four FCF pillars -- those numbers become your starting line. Week 12 retests the same panel, and the results shape how Block 2 gets built. Every training week has a fillable page: check off what you complete and log load, reps, duration, or notes directly in the PDF.

The Four Pillars, mapped to your week

STRENGTH	Tue + Fri	Lower/posterior chain and upper/pull strength work, on true open days. Progressive overload across three phases.
FOUNDATION	Thu + Sun	Short core circuit after Thursday BJJ, plus the long aerobic session Sunday -- your ultra base.
MOBILITY	Mon + Wed (post-BJJ)	15-20 min flow after BJJ: hips, T-spine, ankles. Keeps joints ready for load.
LONGEVITY	Sat + Sun	Sauna, cold plunge, red light after Saturday teaching/rolling; Wim Hof breathwork Sunday.

Phase progression

Week 1	Baseline Panel	Establish starting numbers across all 4 pillars.
Weeks 2-5	Foundation Phase	Higher reps (3x12-15), moderate load. Priority: movement quality.
Weeks 6-9	Build Phase	Lower reps (4x8-10), heavier load. Priority: strength accumulation.
Weeks 10-11	Peak Phase	Heaviest loads (4-5x4-8), longest aerobic days, weighted carries.
Week 12	Deload + Retest	Light training, then repeat the Baseline Panel to measure the block.

Proper timing for every tool in the stack -- reference this, don't guess.

Wim Hof breathwork runs daily. Everything else below is dosed and placed on specific days in the weekly pages so tools don't stack on top of each other or interfere with adaptation -- notably, cold plunge is kept off strength days since cold immersion within a few hours of lifting can blunt hypertrophy signaling.

TOOL	FREQUENCY	DURATION	BEST TIMING
Wim Hof Breathwork	Daily	15-20 min, 3-4 rounds	Anytime; Sun gets the extended session
Red Light Therapy	3-5x/week	10-20 min	After strength work (Tue/Fri)
Infrared Sauna	3-5x/week	20-30 min @ 120-140F	Sat anchor session, post-teach
Cold Plunge	2-3x/week	2-5 min @ 50-59F	Wait 4-6 hrs after strength; safe on Sat/BJJ days
Steam	3-4x/week	15-20 min	Sun, after the long aerobic session
Normatec Boots + Hip Attachment	3-4x/week	20-30 min	After BJJ (Thu) and long runs (Sun)
Venom Back/Shoulder Wrap	As needed	15 min	Post-strength, Sat recovery block
Venom Lower Back Band	As needed	15 min	Post-strength or long run, Sat recovery block
Power Plate	2-3x/week	10-15 min recovery mode; 5-10 min pre-train mobility	After Friday strength
Stick Mobility	Mon/Wed/Thu	Built into the post-BJJ mobility flow	15-20 min flow
RAD Massage Ball Kit	3-4x/week	5-10 min per area	Pair with mobility flow days
NeoCarbon EMS Stim	3x/week	20-30 min, recovery mode	Target the muscles trained that day

Baseline Panel -- All 4 Pillars

Log these numbers once, at the start and end of Block 1.

Week 12 -- Deload

PROJECT 50

Light training only. Retest panel is on the next page.

WEEK 12 -- DELOAD

This week is intentionally light. Same weekly rhythm, but strip volume and intensity back roughly 50%: bodyweight or light-load versions of Tue/Fri strength work (2x10, easy effort), a short 20-minute core circuit on Thursday, and a short 30-minute easy shakeout instead of the long trail day on Sunday. Keep BJJ, mobility, teaching/rolling, and longevity practices as normal -- this week is about arriving fresh for the retest.
